Address: 1737 Marshville Road,
Alabama.

Objective

As a Generative AI Engineer, conducted cutting-edge research in generative models such as GANs and VAEs. Developed novel algorithms and architectures to push the boundaries of AI-generated content. Collaborated with cross-functional teams to integrate research findings into practical applications.

Skills

Deep Learning, Neural Networks.

Work Experience

Generative AI Engineer

Delta Corporation - 2000 - 2001

- Researched generative AI models to enhance understanding and capabilities.
- Developed neural network architectures for generative models using TensorFlow.
- Implemented algorithms for natural language processing tasks like text generation.
- Trained GANs and VAEs on large-scale datasets for diverse applications.
- Optimized model performance through hyperparameter tuning and regularization techniques.
- Conducted experiments to evaluate model robustness and generalization capabilities.
- Collaborated with cross-functional teams to integrate AI solutions into products.

Generative AI Engineer

Delta Corporation - 2007 - 2018

- Designed and implemented data pipelines for preprocessing and model training.
- Debugged and fixed issues related to model convergence and performance degradation.
- Contributed to research publications and patents on generative AI technologies.
- Provided technical guidance and mentorship to junior AI engineers and researchers.
- Implemented adversarial training techniques to improve model resilience against attacks.
- Evaluated and integrated third-party AI tools and libraries into existing workflows.
- Deployed generative models in cloud environments for scalability and accessibility.

Education
